Aussie Locker XD-13227 Dana 30 JK Next Generation Installation Supplement

Thank you for your purchase of the XD-13227 Dana 30 Aussie Locker for 2007 to 2014 JK and JKU Jeep with open carrier differentials.

On the Aussie Locker axle gears you will see grey custom thrust washers. These washers are specifically designed and manufactured for the XD-13227 installation and should not be used for any other purpose.

In this installation you will NOT be using the factory OE thrust washers as described in the standard Installation Manual. Simply replace the existing thrust washers with the new gray thrust washers and then fall the Installation Manual for the remainder of the installation process.

Note: In some installations binding is experienced in very tight turns and this can be eliminated by a slight reduction in the turn radius.

Aussie lockers are 100% made in the USA.
